

PROJECT: Fond du Lac High School

LOCATION: Fond du Lac, WI

Schools | Fond du Lac High School

CHALLENGE

Like all schools, safety was a primary consideration. The vast number of doors and windows could potentially challenge the established deadline.

UNIQUE ISSUES

- ▲ Window walls specified with hollow metal framing
- ▲ Over 800 interior doors and supporting frames
- ▲ Curved wall system for large bank of doors and windows

SOLUTION

Dedication to the schedule and deadline required hours beyond those originally estimated, however the deadline and the original budget were met. Tri City Glass & Door fabricators custom-made hollow metal frames to accommodate the glass of the window wall, as well as the curved framing that held multiple entrance/exit doors. The windows created a contemporary structure with drama and functionality.

PRODUCTS USED

- ▲ Framing: Segmented interior window frames
Gray painted hollow-metal exit doors and frames
- ▲ Doors: Plain sliced solid Red Oak doors
Fire-rated and fire separation doors
- ▲ Hardware: Special hardware for high traffic

MORE SCHOOL PROJECTS

Tri City Glass & Door has worked on schools throughout Wisconsin and neighboring states. Some examples include:

- ▲ Waupaca High School, Waupaca
- ▲ Kohler High School, Kohler
- ▲ Pulaski High School, Pulaski*
- ▲ Addison Elementary School, Addison
- ▲ St. Mary Elementary School, Menasha
